Japles A. Dudek Brimary Examiner Art Unit: 2871

10. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s).

11. 🖸 The request for reconsideration has been considered but does NOT place the application in condition for allowance because:

Continuation of 11. does NOT place the application in condition for allowance because: the applicant claims that the distance between the dots in one direction is equal to or less than the distance in another direction; Examiner still asserts that the reference anticipates such a limitation. I addition to the previous arguments, the claim do not limit the the invention to all the dots in one direction equal to or less than the distance of all the dots in the other direction. Thus, if there are three dots not in a line, the limitation is anticipated. Futhermore, the specification supports at least three dots not in a line. As the reference teaches at least three dots not in a line, the first direction would be from the first dot to the second dot and the second direction would be from the first dot to the third dot. The distance between the first and second dots must be equal to, less than or greater than the distance between the first dot and the third dots. If it is greater than one merely make the first direction the direction from the first dot to the third dot.
